

## **Jeffrey Kline**

Manager, Technology and Management Consulting  
RSM US LLP  
Sioux Falls, South Dakota  
jeffrey.kline@rsmus.com  
+1 605 575 0522

### **Summary of experience**

Jeffrey has over 26 years of experience in information technology, focusing primarily on information security, system design, administration, and project management. He works extensively with heavily-regulated clients in the financial services, public utilities, and healthcare sectors.

Jeffrey provides detailed system designs for clients with a focus on storage and virtualization solutions, storage area networks (SANs), Microsoft Windows Active Directory, disaster recovery planning, and backup solutions. In addition, he provides project management services to clients and acts as a liaison between clients, technicians, and third-party vendors.

Besides client-facing engagements, Jeffrey is a member of a RSM team of subject matter experts where he tests, standardizes, and documents best practices for storage and virtualization deployments for use throughout RSM.

Prior to joining RSM, Jeffrey worked for a Fortune-100 global financial institution as a lead system administrator where he was responsible for the uptime and administration of thousands of network nodes and hundreds of server systems located throughout the world. He was instrumental in the startup and infrastructure design of a number of dot-com companies and later founded his own information technology consulting firm. In this role, he advised many mid-sized companies in technology-related projects.

### **Education**

- Master of Science, information systems, Dakota State University
- Bachelor of Science, South Dakota State University
- Graduate-level coursework in Microsoft Windows Server 2008, UML 2.0, Project Management, JavaScript, Systems Analysis and Design, Modern Cryptography, Network Security, and Technical Communication and Documentation
