MATH 2423 Syllabus
Calculus and Analytic Geometry II

Purpose of the Course
This course is designed as the second of four courses in the Calculus and Analytical Geometry sequence. Students will understand calculus and analytical geometry concepts through visualization, numerical, and graphical experimentation.

Course Description
Topics covered include:

- The Fundamental Theorem of Calculus;
- Indefinite and definite integrals;
- Area and accumulation;
- Volume by shells, washers, and cross-sections;
- Techniques of integration including u-substitution, integration by parts, partial fractions, trigonometric identities, and trigonometric substitution;
- Calculus with natural logarithm and exponential functions;
- Indeterminate forms and improper integrals.

Required Text and Materials
Enhanced WebAssign. A code must be purchased to gain access to course materials.

You will find the course code inside the course in Canvas.

This code only allows you into the course. You will lose access to the materials within 30 days unless you get an access code for the textbook and resources.

You will need to purchase an access code for your WebAssign course. To purchase your access code, you will need to log into WebAssign and enter your course code and then purchase the textbook access code once you access the course. You want to purchase the LIFETIME OF EDITION version, which will allow you to have access to the text for all the WebAssign courses that use the text.

The last item required for this course is a graphing utility. The most convenient graphing utility is a graphing calculator, such as the TI-84 or TI-86. Note that you may use a graphing calculator on your exams, but it cannot have the ability to perform symbolic manipulation (TI-89 and higher are not allowed).

You will need access to a computer equipped with high-speed internet access and a program that opens and reads PDF files.

Optional Materials
Note: The text is included in its entirety (same page references, etc.) and viewable inside a web browser from your Enhanced WebAssign account. Since you have the textbook in electronic form, you do not need to purchase the textbook in physical form unless you specifically choose to.

**Prerequisites**

MATH 1823 at OU, or satisfactory score on the placement test, or, for incoming freshmen direct from high school, satisfactory score on the ACT/SAT.

**Lesson Assignments**

To start a lesson, begin with reading the corresponding section(s) from the textbook. The contents of each lesson can be found on the following page. The reading can be done from the physical text or from the eBook via your Enhanced WebAssign (EWA) account. **This is the most important part of this course.** Skimming through the pages will not suffice. It is imperative that you read every word and understand every word. Often, when there is a paragraph with a long equation stuck in the middle of it, people tend to skip over the equation. Even I catch myself doing this, and I love math! Force yourself to read each equation through slowly. In between textbook readings, you should view the PowerPoint file for the lesson, also accessible from your EWA account. These are notes written to accompany (not replace) the text.

Remember that you aren’t expected to understand everything the first time you see it. It is normal to have to read some things two or three times before it starts making sense. Don’t worry if you have to read something five or six times. Moreover, don’t despair if one concept, like epsilon-delta proofs, never gels. The effort you put forth now will be fruitful eventually.

**Homework**

The homework is assigned on the Enhanced WebAssign (EWA) platform, which you access through the Canvas page for the course. If you have not used an online course management system before, it may take a little bit of time before you feel comfortable with the interface. Try to be patient. EWA contains a variety of resources for you, and you should take advantage of them (or at least try them out). These include links to the textbook, multimedia content such as instructional video clips, tutorial exercises, plus helps and hints. You can work the problems multiple times, so it is possible to get 100% on every homework assignment by being persistent.
About the Grading

Exams
There are four exams for this course. All exams are done on paper so that you can show your work. Note that you may use a graphing calculator on your exams, but it cannot have the ability to perform symbolic manipulation (TI-89 and higher are not allowed).

Course Grade
Your grade will be calculated by two different methods, and the higher of the two results will determine your course grade.

- Method #1: Average your four exam scores, weighting each equally.
- Method #2: Weight each exam 22% and weight your homework average 12%.

The first method allows students to be selective about working homework in a way that is useful to them without being penalized for not doing assigned problems over topics that they may already have mastered. The second method deals with borderline grades, as a strong homework score can raise your score to the next letter grade if your exam average doesn't quite get you there.

Problems or Questions
If you have course content-related questions, please email your instructor. If something isn’t working right in Canvas, email ciddev@ou.edu with a description of the problem and the course you are in.

Academic Integrity
As a student taking a course at the University of Oklahoma, you are expected to uphold the academic integrity code. Please visit the Academic Integrity website at http://www.ou.edu/integrity and familiarize yourself with the standards you will be held to while taking your course.

Religious Observance
It is the policy of the University to excuse the absences of students that result from religious observances and to reschedule examinations and additional required classwork that may fall on religious holidays without penalty.

Reasonable Accommodation Policy
Students requiring academic accommodation should contact the Accessibility and Disability Resource Center for assistance at (405) 325-3852 or TDD: (405) 325-4173. For more information, please see the Accessibility and Disability Resource Center website at http://www.ou.edu/drc. Any student in this course who has a disability that may prevent him or her from fully demonstrating his or her abilities should contact the instructor personally as soon as possible to discuss accommodations necessary to ensure full participation and facilitate educational opportunities.

Adjustments for Pregnancy-Related and Childbirth-Related Issues
Should you need modifications or adjustments to your course requirements because of documented pregnancy-related or childbirth-related issues, please contact me as soon as possible to discuss.
Generally, modifications will be made where medically necessary and similar in scope to accommodations based on temporary disability. Please visit the Institutional Equity Office website at http://www.ou.edu/eoo/faqs/pregnancy-faqs for commonly asked questions.

Title IX Resources and Reporting Requirement
For any concerns regarding gender-based discrimination, sexual harassment, sexual misconduct, stalking, or intimate partner violence, the University offers a variety of resources, including advocates on call 24/7, counseling services, mutual no-contact orders, scheduling adjustments, and disciplinary sanctions against perpetrators. Please contact the Sexual Misconduct Office at 405-325-2215 (8 to 5, M–F) or OU Advocates at 405-615-0013 (24/7) to learn more or to report an incident. In addition, please be advised that a professor/GA/TA is required to report instances of sexual harassment, sexual assault, or discrimination to the Sexual Misconduct Office. For more information, please visit the Institutional Equity Office website at http://www.ou.edu/eoo/.
Course Plan for MATH 2423

Lesson 1
1. Read Section 4.1: Area and Distances in your Calculus text.
2. View Lesson 1 PowerPoint
3. Complete MATH 2423 Lesson 1 Assignment

Lesson 2
1. Read Section 4.2: The Definite Integral in your Calculus text.
2. View Lesson 2 PowerPoint
3. Complete MATH 2423 Lesson 2 Assignment

Lesson 3
1. Read Section 4.3: Integrals and Antiderivatives in your Calculus text.
2. View Lesson 3 PowerPoint
3. Complete MATH 2423 Lesson 3 Assignment

Lesson 4
1. Read Section 4.4: Indefinite Integrals in your Calculus text.
2. View Lesson 4 PowerPoint
3. Complete MATH 2423 Lesson 4 Assignment

Lesson 5
1. Read Section 4.5: The Substitution Rule in your Calculus text.
2. View Lesson 5 PowerPoint
3. Complete MATH 2423 Lesson 5 Assignment

Exam 1
1. Schedule Exam 1
2. Take Exam 1 on paper

Lesson 6
1. Read Section 5.1: Areas Between Curves in your Calculus text.
2. View Lesson 6 PowerPoint
3. Complete MATH 2423 Lesson 6 Assignment

Lesson 7
1. Read Section 5.2: Volumes in your Calculus text.
2. View Lesson 7 PowerPoint
3. Complete MATH 2423 Lesson 7 Assignment
Lesson 8
1. Read Section 5.3: Volumes by Cylindrical Shells in your Calculus text.
2. View Lesson 8 PowerPoint
3. Complete MATH 2423 Lesson 8 Assignment

Lesson 9
1. Read Section 5.4: Work in your Calculus text.
2. View Lesson 9 PowerPoint
3. Complete MATH 2423 Lesson 9 Assignment

Lesson 10
1. Read Section 5.5: Average Value of a Function in your Calculus text.
2. View Lesson 10 PowerPoint
3. Complete MATH 2423 Lesson 10 Assignment

Lesson 11
1. Read Section 6.1: Inverse Functions in your Calculus text.
2. View Lesson 11 PowerPoint
3. Complete MATH 2423 Lesson 11 Assignment

Lesson 12
1. Read Section 6.2: Exponential Functions and Their Derivatives in your Calculus text.
2. View Lesson 12 PowerPoint
3. Complete MATH 2423 Lesson 12 Assignment

Exam 2
1. Schedule Exam 2
2. Take Exam 2 on paper

Lesson 13
1. Read Section 6.3: Logarithmic Functions in your Calculus text.
2. View Lesson 13 PowerPoint
3. Complete MATH 2423 Lesson 13 Assignment

Lesson 14
1. Read Section 6.4: Derivatives of Logarithmic Functions in your Calculus text.
2. View Lesson 14 PowerPoint
3. Complete MATH 2423 Lesson 14 Assignment
Lesson 15
1. Read Section 6.6: Inverse Trigonometric Functions in your Calculus text.
2. View Lesson 15 PowerPoint
3. Complete MATH 2423 Lesson 15 Assignment

Lesson 16
1. Read Section 6.7: Hyperbolic Functions in your Calculus text.
2. View Lesson 16 PowerPoint
3. Complete MATH 2423 Lesson 16 Assignment

Lesson 17
1. Read Section 6.8: Indeterminate Forms and L’Hospital’s Rule in your Calculus text.
2. View Lesson 17 PowerPoint
3. Complete MATH 2423 Lesson 17 Assignment

Lesson 18
1. Read Section 7.1: Integration by Parts in your Calculus text.
2. View Lesson 18 PowerPoint
3. Complete MATH 2423 Lesson 18 Assignment

Exam 3
1. Schedule Exam 3
2. Take Exam 3 on paper

Lesson 19
1. Read Section 7.2: Trigonometric Integrals in your Calculus text.
2. View Lesson 19 PowerPoint
3. Complete MATH 2423 Lesson 19 Assignment

Lesson 20
1. Read Section 7.3: Trigonometric Substitution in your Calculus text.
2. View Lesson 20 PowerPoint
3. Complete MATH 2423 Lesson 20 Assignment

Lesson 21
1. Read Section 7.4: The Method of Partial Fractions in your Calculus text.
2. View Lesson 21 PowerPoint
3. Complete MATH 2423 Lesson 21 Assignment
Lesson 22
1. Read Section 7.5: Strategy for Integration in your Calculus text.
2. View Lesson 22 PowerPoint
3. Complete MATH 2423 Lesson 22 Assignment

Lesson 23
1. Read Section 7.6: Integration Using Tables in your Calculus text.
2. View Lesson 23 PowerPoint
3. Complete MATH 2423 Lesson 23 Assignment

Lesson 24
1. Read Section 7.8: Improper Integrals in your Calculus text.
2. View Lesson 24 PowerPoint
3. Complete MATH 2423 Lesson 24 Assignment

Lesson 25
1. Read Section 8.1: Arc Length in your Calculus text.
2. View Lesson 25 PowerPoint
3. Complete MATH 2423 Lesson 25 Assignment

Lesson 26
1. Read Section 8.2: Area of a Surface of Revolution in your Calculus text.
2. View Lesson 26 PowerPoint
3. Complete MATH 2423 Lesson 26 Assignment

Lesson 27
1. Read Section 8.3: Application to Physics and Engineering in your Calculus text.
2. View Lesson 27 PowerPoint
3. Complete MATH 2423 Lesson 27 Assignment

Exam 4
1. Schedule Exam 4
2. Take Exam 4 on paper
