IAS 5940-507: Topics in International Studies: U.S. Intelligence Community

Course Description:
The US Intelligence Community (IC) is a vital national security institution with a critical mission and a rich, fascinating history. This course is designed to provide a comprehensive survey of the historical origins and continued development of US intelligence capabilities. The course will also provide an in-depth overview of intelligence processes, including collection disciplines and analytic techniques, the US IC uses to produce finished, all-source intelligence products for senior national security decision makers. We will take a comprehensive look at the roles, missions, and structure of the 17 organizations which comprise the US Intelligence Community. The course will also examine how the US IC supports national security decision making, how the three branches of the US federal Government provide oversight, and how the IC is adapting to new international security challenges. We will examine the ethical and moral issues associated with intelligence operations. Finally, the course will also look at foreign intelligence services, their targets, and operational successes and failures.
