HR 5970-425: The Prevention/Intervention of Critical Social Issues

Course Description:
Social issues refer to the problems that affect people living together in a society. In the US, some predominant social issues include the growing divide between rich and poor; youth violence; unemployment; pollution; urban decay; racism and sexism; and many others. Social problems faced by developing countries include issues of poverty, food shortages, lack of basic hygiene, spread of incurable diseases, ethnic cleansing, and lack of education. Solving problems before they become a national crisis benefits entire at-risk populations and saves time, money, and resources. Effective prevention and intervention programs can make these benefits a reality. This course will provide a synthesis of prevention/intervention efforts, research, and methodology targeting today's most pressing social problems that affect society on both a domestic and international level.
